

Engage **your** audiences with **your** content in **minutes**—with Panelz.

Get started with these four easy steps

1

Get Your Hardware and App

- Purchase an [Amazon Fire TV Stick 4K Max](#) and connect it to your display.
- Register your Fire TV Stick and install any system updates by going to Settings > My Fire TV > About > Install Update
- Use the Search function on the Fire TV Stick to search for the Panelz app and download it.
- CRITICAL SETTING: Once you have installed all available updates, go to Settings > Preferences > Data Usage Monitoring > and turn off 'Still Watching'. Failure to complete this step will result in your Fire TV Stick returning to the Home screen or going black after approximately 1 hour.

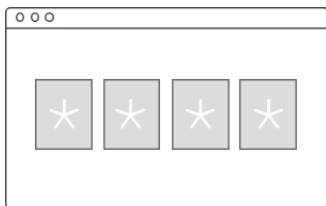

2

Register Your Online Dashboard

- From your computer, register your Panelz account by visiting <https://app.panelz.io/register>.
- Enter your payment information by clicking [Add payment info](#).

3

Sync Your Display

- Launch the Panelz App on the Fire TV Stick to display a 4 character sync code.
- Login to your online dashboard at <https://app.panelz.io/login> and then click the + in the top right corner of the Displays column. Name your display and enter the sync code and hit 'Save' to connect the display to your dashboard.

4

Upload and Publish Your Content

- Upload slides and/or video content to your media Library.
- Create a playlist and populated it with content.
- Select the playlist you want from the dropdown menu under your display.
